

COVID-19 brings international tourism to a standstill in April

- International tourist arrivals (overnight visitors) saw a decrease of 44% in the first four months of 2020 over the same period of last year, according to data reported so far by destinations.
- International arrivals declined 97% in the month of April, reflecting travel restrictions in 100% of all destinations worldwide, amid measures to contain the spread of the COVID-19 pandemic.
- This represents a loss of 180 million international arrivals compared to the same period of 2019, which translates into US\$195 billion in lost international tourism receipts (export revenues).
- By regions, Asia and the Pacific, the first region to suffer the impact of the pandemic, saw a 51% decrease in arrivals in January-April 2020. Europe recorded the second strongest decline with 44% fewer arrivals, followed by the Middle East (-40%), the Americas (-36%) and Africa (-35%).
- Tourism is showing positive signs of a gradual but still cautious change in trend for the upcoming Northern Hemisphere peak summer season. This is reflected in the gradual lifting of travel restrictions in several countries around the world and the resumption of some international flights.

About the UNWTO World Tourism Barometer

The *UNWTO World Tourism Barometer* is a publication of the World Tourism Organization (UNWTO) that monitors short-term tourism trends on a regular basis to provide global tourism stakeholders with up-to-date analysis on international tourism.

The information is updated several times a year and includes an analysis of the latest data on tourism destinations (inbound tourism) and source markets (outbound tourism). The Barometer also includes a Confidence Index based on the UNWTO Panel of Tourism Experts survey, which provides an evaluation of recent performance and short-term prospects on international tourism.

The UNWTO Secretariat wishes to express its gratitude to those who have contributed to the production of this *UNWTO World Tourism Barometer*, in particular to institutions that supplied data, and to the members of the UNWTO Panel of Tourism Experts for their valuable feedback and analysis.

This report was prepared by the **UNWTO Tourism Market Intelligence and Competitiveness Department**, under the supervision of Sandra Carvão, Chief of the Department. Contributors include (in alphabetical order): Fernando Alonso, Michel Julian, and Javier Ruescas.

For more information including copies of previous issues, please visit: www.e-unwto.org/loi/wtobarometereng

We welcome your comments and suggestions at barom@unwto.org.

Data collection for this issue was closed mid-June 2020.

The next issue of the *UNWTO World Tourism Barometer* with more comprehensive results is scheduled to be published on August/September 2020.

The document with Statistical annex is available free of charge for UNWTO Members and subscribers from the UNWTO elibrary at www.e-unwto.org. This release is available in English, while the Statistical Annex is provided in English, French, Spanish and Russian.

International tourism down 44% in January-April 2020 amid COVID-19

- The COVID-19 pandemic has caused an unprecedented disruption to travel and tourism, bringing world destinations and outbound markets to a standstill.
- International tourist arrivals (overnight visitors) saw a decrease of 44% in the first four months of 2020 over the same period of last year, according to data reported so far by destinations.

- In the month of April tourism came to a halt, with international arrivals down an unprecedented 97%, reflecting widespread travel restrictions in 100% of destinations worldwide (217 destinations), amid measures to contain the spread of the COVID-19 pandemic. This follows an already massive 55% drop in international tourist arrivals in the month of March.
- All world regions and subregions saw a decrease in international arrivals in April in the range of 90%-100%. Some 113 million international arrivals were lost in April, which was expected to be one of the busiest travel months in 2020 due to Easter holidays.
- By regions, Asia and the Pacific, the first region to suffer the impact of the pandemic, saw a 51% decrease in arrivals in January-April 2020. Europe recorded the second strongest decline with 44% fewer arrivals, followed by the Middle East (-40%), the Americas (-36%) and Africa (-35%).
- At the subregional level, North-East Asia (-56%) and Southern-Mediterranean Europe (-52%) suffered the largest drop. Arrivals in South-East Asia, Oceania, North Africa, Northern Europe and Central and Eastern Europe were down 40% or more.

Unprecedented low levels in all industry indicators

- **IATA** points to a decline of 43% in international passenger demand measured in revenue passenger kilometers (RPKs) in January-April, with a 98% drop in April, similar to the decline in international tourist arrivals. All regions posted declines in international RPKs close to 100% in April.
- Data from **ForwardKeys** shows a massive 97% year-on-year drop in international air bookings made between 6 January and 14 June 2020 for travel in any period of the year. By departure region, Asia and the Pacific (-105%) suffered the biggest drop. Air bookings from the Americas (-96%), Europe (-94%), and Africa and the Middle East (-81%) all recorded severe decreases in the period covered.
- **STR** indicates that the hotel industry continued to suffer large double-digit declines in revenue per available room (RevPAR) and occupancy, with unprecedented low levels across all world regions during April 2020. Occupancy in April reached record lows of 11% in Europe, 12% in Central and South America, 13% in Africa, 25% in the United States, 28% in Asia and the Pacific and 31% in the Middle East.

Note: Percentage declines larger than 100% reflect more cancellations than new bookings.

Gradual and cautious restart of tourism in the summer season

- Tourism is showing positive signs of a gradual but still cautious change in trend for the upcoming Northern Hemisphere peak summer season. This is reflected in the gradual lifting of travel restrictions in several countries around the world and the resumption of some international flights. The creation of travel corridors, the implementation of safety and hygiene protocols, as well as efforts to promote domestic tourism are among the measures being introduced by governments as destinations look to a gradual restart.
- As of 18 May 2020, 3% of all destinations worldwide have eased COVID-19 related travel restrictions. This represents a small share but a welcomed change of trend.
- Several European countries are gradually opening up to international tourism. On 11 June 2020, the

European Commission recommended to Schengen Member States and Schengen Associated States to lift internal border controls by 15 June 2020 and to prolong the temporary restriction on non-essential travel into the EU until 30 June 2020 (https://ec.europa.eu/commission/presscorner/detail/en/ip_20_1035). Several destinations in the Caribbean and the Mediterranean have also announced the reopening of borders to international travel.

- Air booking data from **ForwardKeys** points to a slight improvement in international travel starting in July, which reflects cautious optimism to varying degrees across world destinations.
- However, the outlook is still uncertain, as new cases of COVID-19 continue to be reported worldwide and borders remain closed in the majority of countries.

(Data as collected by UNWTO, June 2020)

* Provisional data

¹ Classification based on the International Monetary Fund (IMF), see the Statistical Annex of the IMF World Economic Outlook of April 2017, page 175, at www.imf.org/external/ns/cs.aspx?id=29.

See box in page 'Annex-1' for explanation of abbreviations and symbols used

Government support to restart tourism is crucial

- As reported in the May 2020 issue of the *UNWTO World Tourism Barometer*, forward-looking scenarios point to possible declines of 58%, 70% or to 78% in international arrivals in 2020 depending on the date of gradual lifting of travel restrictions (July, September or December). These are mostly dependent on the containment of the pandemic, the duration of travel restrictions and the gradual reopening of borders, though uncertainty still remains high.
- The huge loss of travel demand could translate into a drop of 850 million to 1.1 billion international tourists in 2020, and a loss of US\$910 billion to US\$1.2 trillion in export revenues from tourism. As a result, 100 to 120 million direct tourism jobs are at risk, in a context of global economic recession.
- Countries around the world continue to implement a wide range of fiscal, monetary and employment-related measures to mitigate the economic impact of the COVID-19 outbreak and to stimulate the recovery of the tourism sector. Since mid-May, an increasing number of countries have communicated measures to restart tourism, particularly safety and hygiene protocols, and policies to promote domestic tourism. (UNWTO Briefing Note, How are countries supporting tourism recovery?, <https://www.unwto.org/news/as-tourism-restarts-unwto-notes-strong-and-rapid-governments-response-to-covid-challenge>).
- UNWTO calls for the need to reopen tourism in a responsible, safe and seamless manner, as travel restrictions are lifted. Restoring confidence and trust in the sector is crucial.

(Data as collected by UNWTO, June 2020)

Methodological Notes

About the data

The monthly and quarterly statistics included in this issue have been compiled by the UNWTO Secretariat based on preliminary data reported by the institutions of the various countries and territories (e.g. National Tourism Authorities, Statistics Offices, Central Banks) through websites, news releases and bulletins, or provided through direct contacts with officials or through international organisations such as the Caribbean Tourism Organization (CTO), the European Travel Commission (ETC), Eurostat, the Pacific Asia Travel Association (PATA) or the South Pacific Tourism Organization (SPTO).

Information in this issue reflects data available at the time of publication. Data may be updated or revised without notice in future issues of the *UNWTO World Tourism Barometer* as it becomes available.

Countries that are not included, but which have monthly data at their disposal, are kindly requested to contact the UNWTO Secretariat at barom@unwto.org.

For major concepts, definitions and classifications in the measurement of tourism, please see the International Recommendations for Tourism Statistics 2008 (IRTS 2008) at www.unwto.org/methodology.

International Tourist Arrivals data

In the tables on International Tourist Arrivals for the various UNWTO regions, series are chosen that can serve as an indicator of trends in selected destinations.

The monthly series represented do not always coincide with the annual series usually reported for the various countries (e.g. visitor arrivals or nights instead of tourist arrivals) and sometimes only relate to a part of the total tourism flow (e.g. air traffic, specific entry points). See 'Explanation of abbreviations and symbols used' for more detailed information.

The (sub)regional totals are approximations for the whole (sub)region prepared by UNWTO based on trends in the countries with data available.

Data series for international tourist arrivals reported by France correspond to Metropolitan France

International Tourism Receipts and Expenditure data

For destination countries, receipts from international tourism count as exports in the balance of payments (travel) of each country and cover all transactions related to the consumption of goods and services by international visitors, such as accommodation, food and drink, fuel, domestic transport, entertainment, shopping, etc.

They include transactions generated by same-day as well as overnight visitors. Receipts from same-day visitors can be substantial, especially in the case of neighbouring countries where shopping accounts for a large amount of spending by cross-border, same-day visitors.

International tourism receipts (travel) do not include receipts from international passenger transport contracted from companies outside the travellers' countries of residence, which are reported in a separate category (passenger transport).

For the (sub)regional totals, estimates are made by UNWTO for countries that have not yet reported results, based on the previous year's value and the trend for the (sub)region. Unlike arrivals, where revisions generally more or less balance out, receipts data tends to be revised upwards.

It should be noted that data as reflected by UNWTO on international tourism receipts and expenditure for China is based on the balance of payments (BOP) travel credit and debit (as with other countries for reasons of consistency and international comparability) reported by the State Administration of Foreign Exchange (SAFE) at www.safe.gov.cn/en/BalanceofPayments/index.html.

In addition, according to the International Recommendations for Tourism Statistics 2008 (IRTS 2008), the balance of payments includes both business and personal purposes in the "travel" item. Business travel covers goods and services acquired by persons going abroad for all types of business activities. Personal travel covers goods and services acquired by persons going abroad for purposes other than business, such as vacations, participation in recreational and cultural activities, visits with friends and relations, pilgrimages, and education and health-related purposes. The "travel" item does not include international passenger transport, which is reported in a separate category in the BOP, under "transport". For more information, please see the International Recommendations for Tourism Statistics 2008 (IRTS 2008) at: www.unwto.org/methodology and the IMF Balance of Payments and International Investment Position Manual (BPM6) at www.imf.org/external/pubs/ft/bop/2007/bopman6.htm.

It should also be noted that there is a difference in the data of UNWTO and those produced by the Ministry of Culture and Tourism of China (formerly the China National Tourism Administration) for 2014 and subsequent years.

Ranking of International Tourism Receipts and Expenditure

It should be noted that changes in the ranking of international tourism receipts not only reflect relative performance of the destinations, but also exchange rate fluctuations of the local currencies against the US dollar. Conversely, changes in the ranking of international tourism expenditure do not only reflect variations in spending on

outbound travel, relative to other countries, but also changes in the value of the local currency compared to the US dollar.

In 2018 exchange rate movements were generally moderate, with the US dollar depreciating by 4% against the Euro. The US dollar-euro exchange rate moved from an average of 0.885 euro per US dollar in 2017 to 0.847 in 2018. Thus, the effect of converting tourism receipts earned in euros (by Euro area destinations) to US dollars was relatively small. The US dollar also depreciated by 3% against the UK pound and by 2% against the Chinese yuan and Japanese yen, among others. In these destinations tourism receipts expressed in US dollars were higher due to the exchange rates, though to a small extent. The US dollar however, did appreciate to different extents versus the currencies of large emerging markets, such as Brazil, Russia, and India, and quite sharply versus the Argentine peso due to the economic crisis in that country.

Exchange rates and inflation

With financial data measured in different currencies it is complicated to accurately determine variations in relative terms, as receipts have to be expressed in a common currency like the US dollar or the euro and generally are also reported at current prices, thus not taking account of exchange rate fluctuations and inflation.

Exchange rate changes can substantially influence the values in US dollars reported from year to year. When the dollar appreciates against for instance the euro, worldwide receipts expressed in dollars relatively decrease, and vice versa in the case the dollar depreciates.

Year	USD to EUR	Change (%)	EUR to USD	Change (%)
2010	0.7543	5.2	1.3257	-5.0
2011	0.7184	-4.8	1.3920	5.0
2012	0.7783	8.3	1.2848	-7.7
2013	0.7530	-3.3	1.3281	3.4
2014	0.7527	0.0	1.3285	0.0
2015	0.9013	19.7	1.1095	-16.5
2016	0.9034	0.2	1.1069	-0.2
2017	0.8852	-2.0	1.1297	2.1
2018	0.8467	-4.3	1.1810	4.5
2019	0.8933	5.5	1.1195	-5.2

Note: Exchange rates are yearly averages. Source: Compiled from Eurostat

In order to account for exchange rate changes and inflation, international tourism receipts expressed in US dollar values (for reason of comparison) were converted back to the local currencies of each destination, weighted by the share in the total, and deflated by the relevant rate of inflation.
